**DETAILED ACTION**

***Allowable Subject Matter***

1. Claims 1-44 are allowed. The following is an examiner's statement of reasons for allowance: Iacovelli (U.S. 5,350,391) teaches laproscopic instruments including a shaft, a handle, and a photoluminescent marking. Iacovelli does not teach that the photoluminescent marking fluoresces, however, Gain (U.S. 3,840,015) teaches that it is advantageous to have fluorescing markings in surgical instruments in order to allow a surgeon to better view the area being operated on. The prior art of record fails to teach having the fluorescing substance selected in such a way that the excitation range of the substance is in an excitation range of a tumor-specific photosensitizer applied to tissue surrounding the endoscopic instrument, and a single light source selected so that it only emits light of a specific wavelength matching the excitation range of the fluorescent marking and the tissue surrounding the endoscopic instrument to which the tumor specific photosensitizer has been applied. As pointed out by the Applicant on page 2 of arguments filed on 04/15/2004, Iacovelli teaches away from the recited features specifically stating it is desirable to have the markings of the instrument contrast with the corresponding tissues. The current device requires the fluorescent marking to have its excitation range lie entirely in the excitation range of the tumor-specific photosensitizer applied to tissue surrounding the endoscopic instrument.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably

accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
